

Liquid coffee series FK12 / FK20

We proudly present our new range of liquid coffee machines manufactured here at Kaffee-Konzepte.

Our new FK-series machines use the latest in modern technology and offer you high reliability and efficiency in producing coffee beverages.

Freshly brewed flavourful coffee is available within seconds from the press of a button. The exclusive design also offers the ability to display your own illuminated branding on the machine.

These machines have been specifically developed for hospitals, care homes, restaurants and hotels.

We believe that our new range of economical coffee machines satisfy the requirements and expectations of professional coffee users worldwide.

Technical data on the back

Specifications and technical data

FK12: The standard model FK12 with its 12 individually programmable selection buttons offers a variety of speciality coffees made from high quality concentrates supplied either in cans or 'Bag in Box'(BIB). Many drinks including Café Crème, Espresso, Cappuccino and Moccachino as well as hot chocolate and milk from powders and hot water for tea, are available within just a few seconds. This machine has a fast flow rate of up to 6 litres per minute in high speed mode for rapid jug filling.

Cooled compartment for one can or small BIB of coffee

2 containers for instant powders

FK20: The standard model FK20 is designed for black coffee in bulk. It also has 12 individually programmable selection buttons, enabling black coffee in various volumes and strengths to be dispensed. Hot water for tea and other beverages is also available. This machine has a fast flow rate of up to 6 litres per minute in high speed mode for rapid jug filling. Up to two cans of coffee can be inserted which may be the same or different flavours or alternatively it offers the ability to use up to 4 litre BIB.

Cooled compartment for up to two cans or 4ltr BIB of coffee

The constant high quality, high speed dispensing, simple cleaning, quick filling and exact portioning saves your staff time and effort.

Thanks to the modern design, user friendliness and excellent price/performance ratio our machines meet all requirements.
